

AI-Powered Contractual Gap Analysis

Genesis's AI-powered Contractual Gap Analysis automatically scans third-party contracts, SLAs, security questionnaires, and policy documents to surface missing clauses, unmapped regulatory requirements, and operational loopholes.

Vendor Risk Assessment

Information Security Assessment

Security Posture Overview:

Based on the analysis, the security posture of the vendor shows areas of strong compliance but also highlights some weaknesses.

 Finding Gaps in SOC2

Operational Assessment

Service Delivery:

SLA Compliance Rate: 98%
Downtime Incidents: 3 downtime incidents reported, totaling 6 hours of downtime in the last quarter.

 Reading SLA

Features

- Weak Clause Detection**
Identifies missing or vague terms around liability caps, data retention, DR/BCP, breach notification, and SLAs.
- Risk Scoring & Prioritisation**
Ranks gaps by probability and business impact, combining security, financial, and operational factors.
- Contradiction Checker**
Cross-verifies vendor attestations (e.g., “ISO 27001 certified”) against contractual language and evidence repositories.
- Continuous Monitoring**
Watches for new documents, contract amendments, or regulatory changes and triggers re-analysis automatically.

Benefits

Eliminates loopholes that expose you to legal or regulatory penalties.

Flag false claims before they become liabilities.

Keeps risk posture current without manual effort.

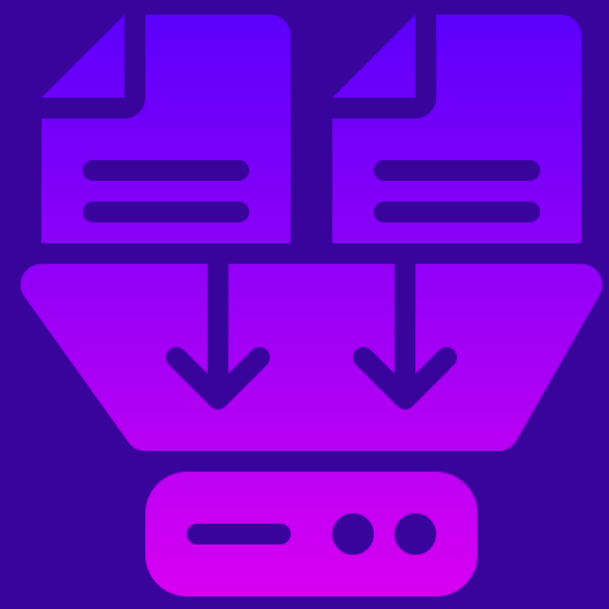

Focuses teams on the highest-risk issues first, saving time and budget.

How It Works

Genesis streamlines your contract analysis process by ingesting documents, identifying compliance gaps with AI, correlating data with vendor risk insights,

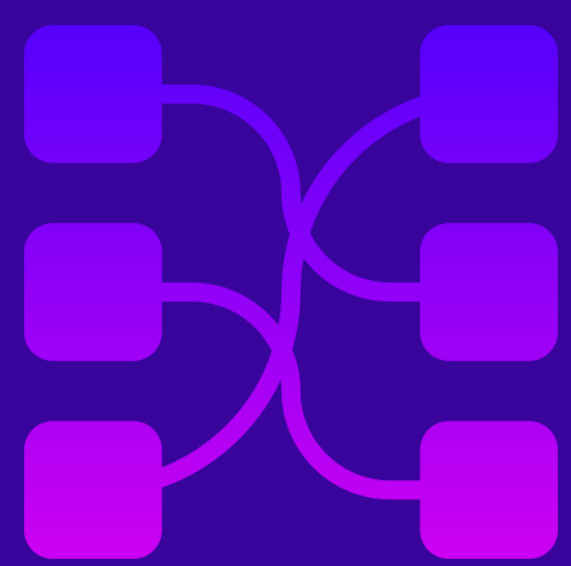

Ingest

Drop contracts Contractual Documents of Vendor or Request them through Genesis Portal.

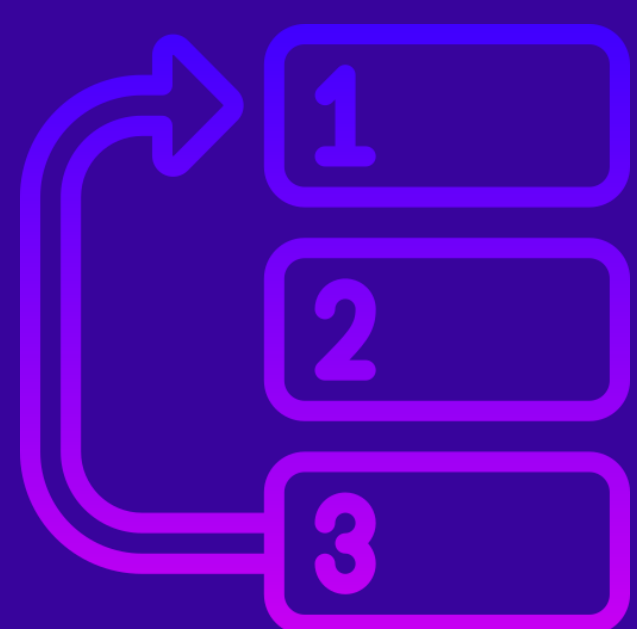

Analyse

The NLP pipeline breaks down, identifies, and links contract clauses to Genesis's compliance categories.

Correlate

Links contractual data with vendor security-scan findings, financial metrics, and SLA telemetry.

Gap Analysis

Identify gaps affecting information security, financial stability, and operational performance.

Track & Remediate

Assign owners, set due dates, and auto-generate remediation language for amendments.

Get a Free Vendor Security Report.

Uncover breaches, data leaks, compliance gaps, and security issues all in under 24 hours
